

# BYOD Education Night

## Apple Event

We would like to invite you into store to find out how the Family Funded program can help you and your child purchase the right device for their studies.

On the night, we will present useful information for first time buyers and parents, helping you to take home the products that best suit your needs. We'll also have our Creative team in store to help you with the setup of your new device, if you wish to do so.
